INDEPENDENT AUDITOR'S REPORT

To the Stockholder
Capital Technology, Inc.
Rowayton, Connecticut

We have audited the accompanying balance sheet of Capital Technology, Inc. (a Delaware corporation) as of December 31, 2004, and the related statements of operations, changes in stockholder's deficit, changes in liabilities subordinated to claims of creditors, and cash flows for the year then ended that you are filing pursuant to Rule 17a-5 under the Securities Exchange Act of 1934. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Capital Technology, Inc. as of December 31, 2004, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The computation of net capital on Page 12 is presented for the purposes of additional analysis and is not a required part of the basic financial statements, but is supplemental information required by Rule 17a-5 under the Securities Exchange Act of 1934. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

CAPITAL TECHNOLOGY, INC.

Notes to Financial Statements

Year Ended December 31, 2004

Note A - The Company

Capital Technology, Inc. (the "Company") was incorporated in the State of Delaware on May 18, 1989. The Company is a registered broker-dealer under the Securities Exchange Act of 1934, and specializes in placements of equity and subordinated debt related to independent power projects. The Company also provides fee-based financial advisory services. The Company's application for membership in the National Association of Securities Dealers, Inc. ("NASD") was accepted on October 15, 1990.

Note B - Summary of Significant Accounting Policies

1. Method of Accounting

Income and expenses are recorded on the accrual method of accounting in accordance with accounting principles generally accepted in the United States of America. The accrual method of accounting recognizes income when earned rather than received and expenses when incurred rather than when paid.

2. Revenue Recognition

Fee income which is contingent upon future events is not recognized until all such future events have occurred and the amount of fees to be received can be determined.

3. Money Market Funds

Money market funds consist of shares held in a single financial institution, and are stated at market value. The Company considers the money market fund to be a cash equivalent except for computing net capital, where a 2% haircut is taken.

4. Use of Estimates

Management uses estimates and assumptions in preparing financial statements. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported revenues and expenses. Actual results could differ from those estimates.

5. Cash and cash equivalents

All investments with an original maturity of three months or less at the date of purchase are considered to be cash equivalents.

CAPITAL TECHNOLOGY, INC.

Notes to Financial Statements

Year Ended December 31, 2004

Note C - Income Taxes

The Company is treated as an S Corporation under the Internal Revenue Code. Accordingly, the Company is not subject to federal income taxes and therefore no provision for federal income taxes is reflected in the accompanying income statement.

Beginning January 1, 2001 S Corporations are no longer subject to income taxes on resident stockholders in the State of Connecticut. Therefore, the accompanying income statement does not reflect a provision for state income taxes.

Note D - Related Party Transactions

1. Subordinated Stockholder Loan

Subordinated stockholder loan, consists of a note which bears interest at 10% and will mature in the year 2009. The NASD has reviewed the terms of the agreement and determined that the borrowing may be used in computing net capital under the Securities and Exchange Commission's uniform net capital rule. To the extent that such borrowings are required for the Company's continued compliance with minimum net capital requirements, they may not be repaid.

2. Other Transactions

Advances from the Stockholder are short-term and non-interest bearing, and totaled \$913 at December 31, 2004.

Effective January 1, 1991, the Company entered into an agreement (the "Services Agreement") with CT Services Company ("CT Services"), a company owned by the Stockholder, whereby CT Services will provide certain operational and administrative services to the Company. Fees paid to CT Services are based on services provided the Company. Under the services agreement, no fees are required to be paid, if such amount would affect the ability of the Company to meet its net capital requirements under the Securities and Exchange Commission's Rule 15c3-1. There were no fees paid to CT Services in 2004.

Note E - Concentration of Credit Risk

The Company only services a limited number of clients in any one accounting period. The Company did not service any clients in 2004.

Note F - Net Capital Requirements

The Company is subject to the Securities and Exchange Commission's ("SEC") Uniform Net Capital Rule (Rule 15c3-1) which requires the maintenance of specified minimum net capital and requires specific ratios of aggregate indebtedness to net capital. The Company was in compliance with these requirements at December 31, 2004.

CAPITAL TECHNOLOGY, INC.

Notes to Financial Statements

Year Ended December 31, 2004

Note G - Exemption from Rule 15c3-3

The Company is exempt from certain provisions of Rule 15c3-3 of the SEC since it carries no customer accounts and does not otherwise hold funds or securities of customers.

---	------------------------

See accompanying notes.

To the Stockholder
Capital Technology, Inc.
Rowayton, Connecticut

In planning and performing our audit of the financial statements and supplemental schedule of Capital Technology, Inc. (a Delaware corporation) for the year ended December 31, 2004, we considered its internal control structure in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control structure.

Also, as required by Rule 17a-5(g)(1) of the Securities and Exchange Commission, we have made a study of the practices and procedures followed by Capital Technology, Inc. including tests of such practices and procedures that we considered relevant to the objectives stated in Rule 17a-5(g) in making the periodic computations of aggregate indebtedness and net capital under Rule 17a-3(a)(11) and for determining compliance with the exemptive provisions of Rule 15c3-3. We did not review the practices and procedures followed by the Company in making quarterly securities examinations, counts, verifications and comparisons, and the recordation of differences required by Rule 17a-13 or in complying with the requirements for prompt payment for securities under Section 8 of Regulation T of the Board of Governors of the Federal Reserve System, because the Company does not carry security accounts for customers or perform custodial functions relating to customer securities.

The management of the Company is responsible for establishing and maintaining an internal control structure and the practices and procedures referred to in the preceding paragraph. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of internal control structure policies and procedures and of the practices and procedures referred to in the preceding paragraph and assess whether those practices and procedures can be expected to achieve the Commission's above-mentioned objectives. Two of the objectives of an internal control structure and the practices and procedures are to provide management with reasonable, but not absolute, assurance that assets for which the Company has responsibility are safeguarded against loss from unauthorized use or disposition and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in conformity with generally accepted accounting principles. Rule 17a-5(g) lists additional objectives of the practices and procedures listed in the preceding paragraph.

Because of inherent limitations in any internal control structure or the practices and procedures referred to above, errors or irregularities may occur and not be detected. Also, projection of any evaluation of them to future periods is subject to the risk that they may become inadequate because of changes in conditions or that the effectiveness of their design and operation may deteriorate.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be material weaknesses under standards established by the American Institute of Certified Public Accountants. A material weakness is a condition in which the design or operation of the specific internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. However, we noted no matters involving the internal control structure that we consider to be material weaknesses as defined above.

We understand that practices and procedures that accomplish the objectives referred to in the second paragraph of this report are considered by the Commission to be adequate for its purposes in accordance with the Securities Exchange Act of 1934 and related regulations, and that practices and procedures that do not accomplish such objectives in all material respects indicate a material inadequacy for such purposes. Based on this understanding and on our study, we believe that the Company's practices and procedures were adequate at December 31, 2004 to meet the Commission's objectives.

This report is intended solely for the use of management, the Securities and Exchange Commission, and other regulatory agencies which rely on Rule 17a-5(g) under the Securities Exchange Act of 1934 and should not be used for any other purpose.

The Professional Associates, P.C.
